LANGUAGES & TECHNOLOGIES

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML/CSS, Responsive design
Backend: Node.js, Java, JSP, Servlet, JDBC, GraphQL, REST API
Test Automation: Selenium WebDriver, C#, .NET, NUnit, Regression testing, CI/CD
Databases: MySQL, MongoDB
Cloud & Tools: AWS, Azure, Version Control/GitHub, Jest
Analytics: Python, SQL, Tableau, Excel

WORK EXPERIENCE

Tata Consultancy Services (TCS) | Systems Engineer | Mumbai, **India** **Dec 2024 - Present**

QA Automation Engineer - DEFRA (UK Government Client) Jan 2026 - Present

- Developed and organised 100+ automated Web UI regression test scripts using **Selenium WebDriver, C# and NUnit,** enabling the team to run structured regression coverage across critical user journeys without manual execution.
- Automation adoption contributed to a team restructure across project, significantly reducing dependency on manual testers and shifting the team toward an automation-first QA model.
- Identified and logged defects through structured test result analysis and log review, providing the development team with reproducible failure reports linked directly to test case results.

Frontend Developer Dec 2024 - Dec 2025

- Built and maintained full-stack web features using **React.js, Next.js, TypeScript, and Tailwind CSS**, delivering responsive, accessible interfaces aligned with design wireframes.
- Wrote unit and integration tests using **Jest**, maintaining high code quality standards across the frontend codebase.
- Collaborated with designers in UI/UX review sessions, translating wireframes and prototypes into pixel-accurate, responsive components.

Galaxy Office Automation Pvt. Ltd. | App Development Intern | Mumbai, **India** **Dec 2022 - Feb 2023**

- Collaborated directly with the Managing Director to design and build a **security processing layer** between two open-source systems (VtigerCRM and Authorizer), reducing inter-system data exposure risk.
- Engineered a **MySQL cross-application database** with custom access controls and data validation, preventing leakage across integrated platforms.
- **Tech Stack:** PHP, MySQL, AWS, Linux, JavaScript, Docker

PROJECTS

Electricity Bill Management System | GitHub 2025

- Collaborated with a team of 3 and developed a fully functional web application with a dynamic Javascript-based front-end, JDBC based communication with a RESTful server-side API, a relational database that stores back-end.
- Implemented stringent validation, Cryptographic hashing, cookies and session-based transactions to prevent unauthorized access, SQL injection, and fraud.
- Designed the application using a multi-layered architecture and Java OOP concepts like encapsulation, inheritance, and polymorphism to ensure scalability, maintainability
- **Tech Stack:** Java, JSP, Servlet, JDBC, MySQL, HTML, CSS, JS.

E-Commerce Platform | GitHub 2025

- The platform enables product browsing, cart management, user authentication, and session persistence, all within a responsive and high-performance UI.
- The frontend is powered by Next.js App Router with server-side rendering for SEO and initial load performance
- Utilized a GraphQL API built with Node.js to efficiently fetch and mutate product and user data, ensuring minimal over-fetching and better client performance.
- **Tech Stack:** Next.js, React.js, Redux Toolkit, GraphQL, TypeScript, Tailwind CSS, Jest

EDUCATION

Thadomal Shahani Engineering College, Mumbai University | B.E. Computer Engineering | GPA: 8.97 | June 2024
Relevant Courses: Software Engineering, Operating Systems, Artificial Intelligence & Machine Learning, Computer Networking, Database Management Systems, Cloud Computing, Cryptography & System Security

CERTIFICATIONS

- Professional Certificate Program in Business Analytics & Generative AI by IIT Roorkee Certificate | **Aug 2025**
- Microsoft AZ-900: Azure Fundamentals Credential | **Nov 2025**

ACHIEVEMENTS

- **TCS Special Initiative Award** - provided technical guidance on AI tools, and mentored participants Link | Dec 2025
